

Here are some suggestions on how to help your tattoo heal!

*Remove the bandage on for 2 to 4 hours

***DO NOT REBANDAGE.**

*With clean hands wash the tattoo with unscented antibacterial soap and water

*Continue to wash 2 times a day until tattoo is healed. Showering is fine, But **DO NOT** soak in the bath tube.

Apply a **very small** amount of ointment 2 times a day for the first 2 to 3 days

*Ointments suggestions are Neosporin or A&D

***Do not over apply ointment**, blot off excess with a clean paper towel

***Do not** use ointment more then 3 days

On the 3rd or 4th day switch to applying an unscented lotion 2 to 3 times a day until tattoo is completely healed

* Unscented lotions suggestions are Lubiderm, Curel or Eucerin

Avoid tight clothing while your tattoo is healing

Avoid the gym, saunas and locker rooms for about a week.

DO NOT expose the new tattoo to the sun, ocean, hot tube, or swimming pool for two weeks.

Do Not use a friends alterative healing method.

*As your tattoo heals you may notice some itching and flaking, this is normal, however if you feel that something is abnormal during the healing process please contact us by phone or stop into the shop.

*Some people are sensitive to certain ointments and lotions, if you are talk to your tattoo artist about an alternative
