

Zennett.com – Art with intention

Our mission is to reconnect the world to the Universal source energy of One Love.

At Zennett.com each painting is handmade from beginning to end, each personalized with its own vibration being infused with positive energy and love at its core.

We believe that everything stems from our intention towards positive thoughts, words and action which will then help raise the vibration of this planet.

Our goal is to get as many paintings out to people who are already turned on and tuned in and those who wants to be and are drawn to its energy.

That goal involves getting our painting out into yoga studios, restaurants, hospitals and hotels in each city, then neighboring towns then expanding out.

The bigger picture is the butterfly effect, connecting the dots of each painting on a map that connects us all to this ONE source energy.

Feel free to look over our current portfolio and let us know if the work speaks to you and inspires you to be a part of this conscious movement.
