Food has always played a central role in fine art, but perhaps most recently, preparing and executing a menu has become, more and more, a fine art form itself. [Hashimoto Contemporary](#)'s Dasha Matsuura is looking at food and drink as a focus in a group of emerging artists, in an exhibition titled *Potluck*.

What *Potluck* speaks to is the universality of food and cooking, both as a personal practice and family tradition. We tell stories through food and sharing a meal, just as good art can tell a story. As Dasha notes of the show, "Ranging from intimate and charged moments to elaborate tablescapes—participating artists in this exhibition offer a piece of their cultures, memories, or social commentary."
