

PROFILE

My career includes over 20 years experience in advertising, marketing, photography and graphic design. I spent many years working as an Art Director for ad agencies before starting my own business.

I specialize in managing projects from concept to finished printed piece. I offer a diverse array of services, including design, illustration and small product photography as well as photography and printing supervision. Providing a professional level of service based on commitment and experience, I strive to deliver the highest quality work possible in a timely and cost efficient manner.

When working with me you can expect ad agency quality work at a substantial cost savings compared to the rates of larger firms.

In addition I'm also a fine artist who loves to paint landscapes and abstract oil paintings.
