Brian Redfern Scenic Designer 📌

ABOUT

My greatest interest as a designer is exploring how physical environments can greatly influence our emotions, shape our experiences, and guide our actions. A false environment for the theatre can be just as powerful in shaping an audience's understanding of a performance.

I'm a California based designer specializing in scenery for the theatre. With over 20 years of experience, I've designed more than 100 productions and pride myself on creative visual storytelling for all shows regardless of size and budget.

I am currently Assistant Professor of Scenic Design at California State University, Chico
