Curriculum Development, Salisbury University

- All course descriptions for ceramics courses have been revised to be more specific to content presented in the courses, and reflect peer institution and national accreditation standards; these changes are currently working their way through the department and university curriculum committees. Course learning objectives were clearly defined, and these have all been included in course syllabi

Curriculum Development, University of Arkansas in Little Rock

- Worked with 3D faculty to redesign our 3D MA program: the degree now has an interdisciplinary focus with Jewelry/Metalsmithing, Furniture, Sculpture, and Ceramics graduate students all housed in the same studio
- Creation of new course ARAD 4355: Mold Making
- All course descriptions for ceramics courses were revised to be more specific to content presented in the courses, and reflect NASAD standards. Course learning objectives were clearly defined, and these have all been included in course syllabi

Curriculum Development, Flathead Valley Community College

- Strengthened *Course Objectives* and *Outcomes* to ensure transfer of credits for all corresponding University courses (at the time of my hire, FVCC Ceramics, 2D Design, and 3D Design Credits were not accepted by Montana Universities)
- Developed Common Course Numbering System for the state of Montana: frequently traveled to the state capital (Helena, MT) to work with faculty from Montana universities to develop *Common Course Numbering System* for all art courses taught in the Montana University System; I was chosen to represent the interests of Montana Community Colleges
- Collaborated with Occupational Trades Faculty to create FVCC Metal/Arts Certificate Program (traditional OT programs now incorporate Fine Arts classes into their curriculum)

- fired clay molds to create forms for the creation of multiple-part plaster molds, which will be used to slip-cast translucent porcelain forms. Public lecture.
- 2016 *Guest Artist*, Southeastern Louisiana University, LA (June 27 – July 1); Handbuilding and Raku firing demonstrations, public lecture
- 2015 *Mold making, handbuilding, and Raku firing demonstrations*, Arkansas Technical University, Russellville, AR (April 9), public lecture
- 2014 *Build & Burn: A Crash Course In Raku Firing Techniques*, Arrowmont School of Arts and Crafts, Gatlinburg, TN (July 13-19). This intensive workshop began with creating clay molds from natural objects and textures and using these bisque-fired clay molds to create forms for the creation of multiple-part plaster molds, which were used to slip-cast translucent porcelain forms and press-mold stoneware pieces for Raku. At the end of the workshop students built and fired their own Raku kiln; each student finished the workshop with clay molds, multiple-part plaster molds, translucent porcelain pieces, and numerous Raku fired pieces. Included a public lecture
- 2013 *National Collegiate Honors Council Conference* in New Orleans, LA. Presented interdisciplinary project (Honors Math and Art, taught at Flathead Valley Community College), included a visual presentation of a permanent tile mural created by students *Build and Burn, a week-long Raku workshop with Stephen Braun*, Clay Studio of Missoula, Missoula, MT (July)
- 2012 *National Council on Education for the Ceramic Arts (NCECA)*, discussion leader with Clara Lanyi (Cochise Community College, AZ), topic: Ceramics Education at Community Colleges
One-Week Mold Making and Raku Workshop, Appalachian Center for Craft, TN (May). This workshop was the same itinerary as the workshop in 2014 at the Arrowmont School of Arts and Crafts. Included a public lecture.
Raku demonstration & workshop, Clay Studio of Missoula, MT (May). One-day workshop; included demonstration on building a fiber kiln, formulating and firing Raku glazes, and other Raku techniques
Raku lecture and demonstration with Stephen Braun, Nicolaysen Art Museum, Cody, WY (January). Demonstration of Raku firing techniques and public lecture
Raku Kiln Building and Firing Workshop, Southern Pottery, LA (January). This was a 2-day workshop with more than 30 students; the first day we built 13 fiber kilns and I demonstrated firing techniques. The second day students brought bisque ware and we Raku fired over 100 pieces that afternoon
- 2011 *Juror of Student Show*, University of Montana, Missoula, MT (December)
Guest Artist at Ohio State University, Athens, OH (May 19 – 23), public lecture
Build & Burn (Hand building and Raku firing), Clay Studio of Missoula, MT (July 9 – 16); this was a two-weekend workshop. The first weekend students explored building techniques for the Raku firing process, the next week we built a fiber kiln and fired all of their work
Raku Workshop: Handbuilding, Raku Kiln Building and Firing, Red Hot Clay Studio, Baton Rouge, LA (January 8 – 15)
- 2010 *Guest Artist*, Nichols State University, LA and Southeastern Louisiana University, LA (March 1 – March 5); handbuilding, mold making, and slip-casting workshops for all levels, with lectures and student critiques at both schools. Public lecture included

- Ceramics Facility (2017-present): Extensive experience maintaining and repairing all studio equipment and facilities (electric kilns, wheels, pug mill, gas kilns, sinks and clay traps, safety equipment, etc.), ordering supplies and maintaining a budget, supervising work-study students, etc.
- Creation of student **Clay Club**, and faculty advisor for the club. Pottery sale fundraisers each semester raise thousands of dollars to fund student travel to the national ceramics conference NCECA (National Council on Education for the Ceramic Arts), visiting artists, and other club activities. Several students attended the 2018 NCECA conference that was held in Pittsburgh, PA. I have also found a site off-campus near the entrance to

Assateague National Seashore where myself and students were able to sell pottery (summer 2018).

- Creation of *Salisbury University Ceramics* Facebook page
- Represented the Art Department at the “Fall for Fulton” event (October 20, 2017); recruitment for all art programs, visited with prospective students and their families
- Art Department Open House (October 21, 2017); demonstrations in the ceramics classroom, visited with prospective students and their families
- Department Committees:
 - Planning Committee for the new Tri-State 3-D facility/renovation, and all of the meetings, site and equipment planning and research, and activities that this project entails (Fall 2017-present)
 - Space Committee (chair), dedicated to researching possible Art Department uses for rooms vacated by the 3D areas in Fulton (when they move to Tri-State), and use of the Student Art Center (SAC House) and gallery
 - Served on the 3D Sculpture/Glass Lecturer Search Committee (Fall 2017)
- Student Advising (currently advise 5 students, Fall 2017)

University of Arkansas in Little Rock:

- Committee assignments (2013 – 2016): Faculty Affairs Committee, Gallery Committee, Health and Safety Committee, Clay Guild Faculty Advisor, MA Revision Committee
- Ceramics Facility (2013 – 2017): Extensive experience maintaining and repairing all studio equipment and facilities (electric kilns, wheels, pug mill, clay mixers, gas kilns, sinks and clay traps, safety equipment, etc.), ordering supplies and maintaining a budget, supervising work-study students, etc.
- UALR Clay Guild faculty advisor (2013 – 2017)
- Participate/Demonstrate during all Department fundraisers and promotional events (also includes the donation of personal artwork to these events):

 - Brad Schweiger (Head of Ceramics, Ohio State University, OH)
- Display of 3-D Design student artwork in the UALR Library (2015 – 2016)
- *Ceramics Awareness Week*; I brought a pottery wheel and tools to the UALR Donaghey Student Center where I and several students demonstrated pottery techniques (November 17–19, 2015)
- Discover UALR Pop-up Applied Design Demonstrations (October, 2015)
- *Maker Faire: Raku, wheel throwing, and handbuilding demonstrations*. North Little Rock, AR (May 2, 2015)
- Planning the Ceramics Facilities for the new building (2015)

- Lecture on my book project *Voodoo Mold-making, an Alternative Guide to Mold-making for Ceramics* (February, 2015)
- *Thea Fest Pottery Demonstrations*, North Little Rock, AR (2014)
- Organized *Primary Clay*, an exhibition hosted by UALR which featured the work of 12 ceramic artists/educators located throughout Arkansas (2014)
- Frequently asked to demonstrate/lecture for Art History, Art Education, and First Year Experience students

Flathead Valley Community College:

- Oversee all 3-D studio facilities, equipment, budget, supervision of student workers, and adjunct coordination and recruitment (2008-2013)
- Construction of several Raku kilns, a small soda kiln, and a small wood/salt/soda kiln built with recycled materials; completed an outdoor 30' X 50' kiln pad where students could explore constructing experimental kilns each semester
- Maintained and repaired all studio equipment and facilities, including repair and maintenance of electric and gas kilns, wheels, slabroller, Soldner mixer, and pugmill
- Built all of the studio tables and shelving in the ceramics studio. Also updated studio with slabroller, extruder, pugmill, and clay mixer (at my hire this equipment was either in disrepair, or hidden in storage)
- Created Student Art Club, and served as Faculty Advisor. The Club raised several thousand dollars each semester through an art sale fundraiser; these funds were used to bring in visiting artists (usually one artist per semester) and for student field trips. Each semester we traveled to the Archie Bray in Helena, MT and visited museums and galleries in Missoula, MT. Spring 2013 the club spent four days in Portland, Oregon touring galleries and museums, and students also attended NCECA (National Council on Education for the Ceramic Arts) 2013 in Seattle, WA
- Coordinated and installed exhibitions--student and faculty work, visiting artists, and community events
- Created and organized 'FVCC Art Department Open House' each semester (usually corresponded with the opening of the Student Exhibition); a full evening of art activities and demonstrations showcasing each area of our Art Department (I fired Raku)
- Each semester I gave presentations at the local high schools and I participated each semester in FVCC's 'College for a Day' program. There is also a group of Elementary students who visited the ceramics studio for a day each semester, part of an anti-drug program
- Served on the FVCC Marketing Committee; also created presentations for FVCC In-Service, and participated each semester with Advising and Recruitment
- Donated thousands of dollars of personal artwork to all school fundraisers and charitable community fundraisers
- Permanent tile mural designed and created by students who attended the interdisciplinary Honors Math/Art class; this large mural covers one whole side of the Arts & Technology Building

Conference Planning

Ceramics Festiva 2013, theme: Alternative Firing (May 22 – 25). I created and organized a symposium featuring ceramic artists from all over the United States including Esther Shimazu (Hawaii), Craig Clifford (Wisconsin), Bryce Brisco (Tennessee), Karl McDade (California), Vernon Patrick (California), Dennis Sipiorski (Louisiana), Shalene Valenzuela (Montana), Trey Hill (Montana), Stephen Braun (Montana), Randi O'Brien (Montana), Robert Markle (Montana), Charles Davis (Montana), Tim Carlburg (Montana), and myself. Conference attendees included approx. 50 ceramics enthusiasts from throughout Montana, and FVCC art students.

Technical Experience

- Responsible for management, maintenance, and repair of all kilns, equipment, and ceramics facilities at the following schools:

- Salisbury University (2017 to present)
- University of Arkansas in Little Rock (2013 to 2017)
- All 3D facilities at Flathead Valley Community College (2008-2013)
- Southeastern Louisiana University, Hammond, LA (2006-2008)
- Maintained kiln pad while attending Louisiana State University (2002-2005)
- Particular expertise in all areas of mold making for ceramics (plaster molds for press-molding or slip-casting, bisque molds for press-molding, etc.), especially casting objects found in nature
- Proficient in firing all low/high fire atmospheric and oxidation (gas or electric) kilns:
 - Have built over 100 Raku kilns (fiber and soft brick)
 - For FVCC I built several Raku kilns, a small wood kiln, and a small soda kiln
 - Assisted with the construction of two large wood fire kilns
 - Attended a two-day training seminar at *Skutt* (Portland, OR) on manual and computerized electric kiln repair (repaired dozens of electric kilns while employed by *Northstar Ceramic Center*)
- Proficient in all levels of clay body and glaze formulation:
 - Developed a retail line of cone 6 and Raku glazes in 2008 for *Southern Pottery/Alligator Clay Company*, Baton Rouge, LA
 - Extensive experience processing natural materials (ash, clays, slips, etc.) for use in developing clay bodies and glazes, especially for specialized firing processes (wood firing, salt and soda firing, etc.)
 - Extensive experience developing special clay bodies (translucent, Raku and experimental firing, freeze-thaw resistant, etc.)
- Other Management Experience:

Northstar Ceramic Center (1999-2002). Responsible for all aspects of a retail ceramic supply: customer service and sales, warehouse management, inventory, deliveries, etc. Also responsible for managing and maintaining the store's contemporary studio
- Alternative Sculptural Materials/Technical Theater: extensive experience constructing sets, scenery, props, puppets, costumes, masks, etc.
 - Eastern Connecticut State University, Storrs, CT (1995-97)
 - Integrity Designworks, Ashford, CT (various free-lance projects, 1995-97)
 - The Hartford Ballet, Hartford, CT (various free-lance projects, 1995-97)
 - Interplayers Theater, Spokane, WA (1994)
- Taxidermist: My father is a taxidermist, and when I was old enough to hold a tool, I worked for him. By the time I graduated high school I was responsible for all of the birds, fish, reptiles, and small mammals that came through our business. At an early age I became proficient with many materials and techniques: foam casting and carving, fiberglass applications, airbrush painting, light carpentry, leather and fabric work, mold making and casting (latex, plaster, polyester resin, etc.), and clay modeling
