I have refined my eye for visual storytelling over the course of my career as an Art Director for major brands spanning television, music, tech and editorial. I have overseen the creation of visual content from pitch through production - collaborating on photo shoot concepts meant to convey campaign messages and illustrate stories, creating visual content for print advertising, marketing and digital campaigns, to help ensure the goals for each project are met. I am adept and recognizing and cultivating talent, working with a team on concepts, planning, and the execution of photo shoots, event materials, and selecting and usage of the most impactful images and art. I am highly organized yet able to remain flexible on the job, always keeping the overall vision clearly in focus.
