Community Engagement

Collaboration is a strong ethos within the School of the Art Institute of Chicago's pedagogy. The sense of community and collaborative environments within our studio practices have pushed perspectives to expand consideration for both ethical and critical concerns. I am interested in architecture which impacts and engages communities. I believe design can benefit people, and go far beyond habitable space.

Key Skills

Collaborative design team experience

Design Software Proficiency - Revit Architecture, AutoCad, Sketch-up Pro, Adobe Illustrator, InDesign and Photoshop

Hand Sketching, architectural modeling, installation and sculpture skill-sets
