

## HOW TO CARE FOR YOUR HANDMADE STONEWARE POTTERY

- All functional wares will last longer if hand washed, but they are dishwasher safe.
- All functional wares are oven-safe and microwave-safe. When heating food or baking in the oven, do not place the piece in a pre-heated oven. Place the piece containing the food in a cold oven first, and then bring the oven up to the desired temperature. This will avoid temperature shock, which could cause the piece to crack. When removing the piece from a hot oven, set it down gently.
- All functional wares are stoneware, not flameware. Do not place on open flame or stove top.
- All stoneware pottery can crack if banged against another hard object or dropped on a hard surface.
