

As of May, 2020, the following projects are in the works:

This is a prototype of a portion of a wind spinning outside sculpture. The finished sculpture will be 84" high and the width will be 45" at its widest point.

FINISHED

This is one half of a 20-gauge expanded metal seahorse sculpture. The finished piece will be brazed and mounted on either a metal or wood base. The height will be approximately 32". The finish may be heat colored.

FINISHED

Here are pictures of the outside sculpture foundation bases being built and moved into position and installed. I'm standing next to Geo!

FINISHED

This outside sculpture took most of the summer of 2003 to complete. It again Has been a project that I have been thinking about for some time now. You can see from the start to the finished installation.
