

LINES & COLORS

Do you like to experiment with new materials and techniques in enamel? My new **LINES & COLORS** class might be the one you are looking for. We will be working with Atomized copper to create lines and textures and explore the endless possibilities to use this material. We will then use different color options to complete our pieces.

I am really excited to share this class with you. I have never seen it used before in conjunction with enamels and each student can create original and unique works of art. I have spent many months exploring this new material and documenting the results for this very special class.

Like my other online classes, Lines & Colors will be held in a private Facebook Group. After you register, I will send you the supply list. If you already have the basic enameling supplies you will only need a couple of new items. And If you have taken any of my online classes before, or if you have not, I am available 24/7 for questions or comments for the duration of the class. My online classes are work at your own pace. I have had many requests for this due to the difficulty of traveling and scheduling, and even cost for traditional instruction. Previous classes have brought together hundreds of students from around the globe. Even if you have a 9 to 5 job, you should still have plenty of time to learn everything.

We will work together in a virtual classroom, share comments, questions and our work. I use many detailed photos in the format of photo albums to show you my techniques step by step. (If you are someone who loves hours of videos, this is not the class for you.)

Cost: \$190 via PayPal or check. For payment information and questions, you can contact me at annemargaretdinan@gmail.com.

The class will begin July 1, 2021. We will be ongoing, so you can sign up anytime and just jump right in.

Hope to see you in class!

Refunds only if requested two weeks before class begins.
