POSES

I can work from live sittings, a photograph, or a combination of both.

Live sittings can be done in my studio or at your home. Meetings take place 1-2 days per week for 1-2 hour sessions.

I can either work from a photo you already have, or I can take the photo. The photo needs to have good detail and excellent lighting.

I can also work from a combination of live sittings and photo references. When a person poses live, there is a vibrancy that is captured that I particularly love. The photo allows me to work in my studio between sittings, speeding up the process.
