

### **PMRCAA Notes Three...**

Witnessed with co-resident, Ren Allathkani, this year's Perseid Meteor Shower at the end of our driveway. Saw about 10-12 comets—one was a huge bulbous flash, its outer edges rimmed with brilliant blue-blue green. We also witnessed the Northern Lights—vivid fuchsia, green and yellow—as well as the Milky Way. Literally a star-studded show...spectacular!

Those colors and the awesome, un-realness of the experience (while being incredibly real) will find their way in my palette, I'm certain of it. But, for the present, they'll swim in the depths of my imagination as I wait for them to come up for air.
