GET FAT, *don't die!*

In the magical universe there are no coincidences and there are no accidents. Nothing happens unless someone wills it to happen. The dogma of science is that the will cannot possibly affect external forces, and I think that's just ridiculous. It's as bad as the church. My viewpoint is the exact contrary of the scientific viewpoint. I believe that if you run into somebody in the street it's for a reason. Among primitive people they say that if someone was bitten by a snake he was murdered. I believe that. [78]
